

Smart People are Cool.™

THE SYSTEMATIZER'S STORY

Phillip was given a building block set when he was four months old and would organize them based on shapes and colors. Doctors thought that this extraordinary ability came from his mother's addiction to Tetris®, a video game that forces you to match shapes and colors. She would spend hours and hours playing this game while she was pregnant with Phillip. As a result, Phillip had an amazing ability to organize and systematize. He spent his entire childhood on talk shows and talent shows. He could put together a 1000 piece puzzle in less than an hour and won a contest for the most complex Lego® system. He made a great deal of money, but didn't use his talent for selfish gain. In fact, after graduating from college, he became a high school principal. Although he grew up in Kentucky, he landed his first job in Denver.

Phillip was the principal who hired Kenny, otherwise known as Dr. Disorganizer. If you recall the story, Dr. Disorganizer quit his job as a janitor at the school and joined **THE UNTEACHABLES**. He is causing many students to live a disorganized and stressful life. Phillip was outraged that Kenny used the tools in the school shed to build his Disaster Blaster and other devices, so he decided to join the **S.M.A.R.T.S. FORCE** as **THE SYSTEMATIZER**. His mission is to help students live a stress-free life by being organized.

THE SYSTEMATIZER went to the same shed to build his organization tools. The first tool he built is called the "Organization Station." This is a portable study area that folds down into the size of a briefcase. It comes equipped with a table, chair, pen, pencil, paper, lighting system, computer and many resources such as a dictionary, encyclopedia, and thesaurus. It was specifically design to combat against the Disaster Blaster. Students defend themselves against the Disaster Blaster by pushing a button on the bottom of the table and students are instantaneously encased in a giant, sound proof, plastic bubble. The second tool he built is called "The Compacter." It combines several notebooks into one for maximum organization. A student simply places every notebook they have into The Compacter. They leave their notebooks inside for thirty seconds and when they open it up, all of their notebooks are organized into one notebook with an assignment sheet, calendar, tab dividers and loose paper. This is perfect for day-to-day organization and is specifically designed to combat **DR. DISORGANIZER'S** Chaos Collectors. The third tool **THE SYSTEMATIZER** built is called "Hyper Washer". This device is a self-contained cleaning system hidden inside The Compacter and removes the Hyper Splash from **DR. DISORGANIZER**.

THE SYSTEMATIZER'S school is completely organized and has received several honors from the state. They have had the highest test scores in the state for the last thirteen years. Their school has also received awards for sports, music, and art. They are so successful because students there understand the importance of organization. Students everywhere can now take advantage of **THE SYSTEMATIZER'S** tools so they can maximize their performance in school and life. Sometimes it is easier to just live an unorganized life, but great rewards come to those who organize themselves and take responsibility for their achievements. Join the **S.M.A.R.T.S. FORCE** and help me defeat **DR. DISORGANIZER**. Remember, smart people are cool!

THE SYSTEMATIZER'S TACTICS AND TOOLS

ORGANIZATION STATION is a portable study area that folds down into the size of a briefcase.

THE COMPACTER is a device used to combine several notebooks into one for maximum organization.

HYPER WASHER is a self-contained cleaning system hidden inside The Compacter that removes **DR.**

DISORGANIZER'S Hyper Splash.

If you are using the DVD/Workbook program in your school or for your family, you may read the stories as a way to set up each section.
